

# Spotlight On: Pegfilgrastim

September 30, 2020

**Technology:** Pegfilgrastim is a PEGylated form of the recombinant human granulocyte colony-stimulating factor (GCSF) analog filgrastim. It stimulates bone marrow to produce neutrophils (a type of white blood cell) to fight infection.

	<i>Amgen v. Apotex</i> 0:15-cv-61631 (S.D. Fla.) '784 Patent settled, '138 Patent not infringed, not unenforceable, invalidity dismissed Fed. Cir. 17-1010 Affirmed	<i>Amgen v. Sandoz</i> 2:16-cv-01276 (D.N.J.) (BPCIA declaratory judgment suit, infringement / invalidity not alleged) Voluntarily dismissed	<i>Amgen v. Sandoz</i> 3:16-cv-02581 (N.D. Cal.) Summary judgment of non-infringement; Fed. Cir. 18-1552 Affirmed, Petition for <i>en banc</i> rehearing granted-in-part, denied-in-part	<i>Amgen v. Apotex</i> 0:18-cv-61828 (S.D. Fla.) Stipulated dismissal	<i>Apotex v. Amgen</i> IPR2016-01542 FWD (All claims unpatentable on request for rehearing); Fed. Cir. 19-2171 Vacated and remanded due to <i>Arthrex</i> ; Sup. Ct. 20-74 Writ of certiorari pending	<i>Kashiv BioSciences v. Amgen</i> IPR2019-00791 Settled after institution	<i>Fresenius Kabi v. Amgen</i> IPR2019-00971 Institution denied	<i>Fresenius Kabi v. Amgen</i> IPR2020-00314 Settled prior to institution decision
